
Discovered Check

A Discovered attack occurs when a piece moves and attacks one of the opponent pieces while revealing a hidden piece behind it that checks the King. In this example you can see that now the Knight moves on f5 to attack the Queen and the so far hidden rook comes into life and checks the King. This is called **Discovered Check**.

Solve the following puzzles

1. Setup the position on your board
2. Spot the placements of your pieces & then look for moving the piece who's stopping the way for the other piece and while moving can also attack the other enemy piece
3. Try to write the notations in the given box
4. Keep your Josh High!
5. Try to write the notations in the given box
